Farmer Direct Marketing

1881 140th Avenue
Baldwin, Wisconsin 54002

Tel: 651-357-6208

Fax: 715-246-4292

Email: kblewis@att.net

Contact: Kevin Lewis, General Manager

Company Profile: Farmer Direct Marketing embodies the extensive experience of our farmer-owners and management in specialty commodity production, processing, and marketing with domestic and international customers. To enhance our marketing opportunities, we work with a few trusted importer-distributors and focus on providing a high

level of ethical customer service. While our primary focus is on identity preserved, food grade non-GMO soybeans and corn from public and proprietary varieties, for our few partner-customers we source additional food and feed grade commodities including edible beans, wheat, organic commodities and processed food and feed ingredients. The best procurement risk management strategy is to choose honorable partners. It is how we manage the risks of professional farming. It is how we operate Farmer Direct Marketing. We invite you to contact us to discuss good business together.

Working directly with farmers, Grain Millers specializes in the production of variety specific IP soybeans for Tofu, Miso, Natto, and Soymilk. Soybeans are processed and shipped from the company-owned food soybean plant in South Central Minnesota, the heart of Midwest USA food soybean production. This facility is operated under strict HACCP and GMP programs assuring customers of the best possible product.

Harmony Agricultural Products - Ohio LLC

20100 Johnson Road

Marysville, Ohio 43040

Tel: 937-644-8215

Fax: 937-644-8225

Email: joe_hanusik@hapioh.com

URL: www.hondatrading-jp.com

Contact: Joe Hanusik

Company Profile: Harmony Agricultural Products Ohio LLC (HAPIOhio) is a fully owned subsidiary of

Honda Trading America Corp. HAPI-Ohio was established in 1999 to provide non-GMO, identity preserved soybeans for food grade uses, primarily to Japan. We have since expanded to provide conventional and organic soybeans for food purposes to Europe, Korea and throughout the U.S. With our internal soybean breeding program we are able to develop and provide high yielding, disease tolerant varieties to our growers while providing our end users with the desired characteristics needed to meet their demands. HAPI-Ohio's IP program combined with our excellent relationship with our growers provide a quality assurance program from producer to end user. Our facility is certified to ISO 14001-2004 standards and operates under the guidelines of ISO 9001-2000 standards. 100% of our products are processed through our state-of-the-art production facility located at Marysville, Ohio and shipped by containers through the Honda rail system, ensuring on time delivery and economical freight costs to our customers.

Inland Empire Milling Co. Inc.

P.O. Box 118

N. 4 Park Avenue

St. John, Washington 99171

Tel: 509-648-3366

Fax: 509-648-3265

Email: david@iemc.com

Contact: David Schauble, Vice-President

Company Profile: Inland Empire Milling Co., Inc. provides whole grain commodities, value-added commodities, and grain by-products to customers in North America, Europe, Asia and the Middle East. Our customers include domestic and international flour mills, brewing and grain based alcohol manufacturers, feed mills, birdseed manufacturers, the horse racing industry, and the livestock and dairy feed industry

IOM Grain LLC

5304 E 100 S

Portland, Indiana 47371

Tel: 260-726-6224

Email: ray@iomgrain.com

URL: www.iomgrain.com

Contact: Ramon Loucks, President

Company Profile: IOM Grain opened its doors in 2003, and the location is no accident. The fact that many growers in the area have raised seed soybeans lends to the idea that a very high quality food grade grain facility could be supplied by growers that understand "Best Management Practices" and "Identity Preservation." IOM Grain is certified by A.I.B. for cleanliness and food safety practices, receiving superior ratings from past inspections. IOM Grain employs the latest technology available in our industry to efficiently create the highest quality grain possible. The infra red technology used in our plant is recognized as the gold standard for food safety. This system examines every seed for imperfections while processing up to 35,000 pounds of grain per hour. IOM Grain currently processes 9 different grain varieties that are packaged and shipped according to customer specifications.

JB Global

Tel: 816.862.8203

Fax: 816.862.8206

Email: mjcook@necoseed.com

URL: www.necoseed.com

Contact: Mike Cook President

Company Profile: NeCo Seeds was established in 1978. We understand how important it is to provide a high quality product with good service in forming a long-term relationship. NeCo Seeds assists in the production, variety selection, identity preservation, storage, conditioning, and packaging of agricultural products through a network of growers raising specific agricultural products on their farms. NeCo provides this service at various production sights throughout the United States. Each sight has its own unique characteristics which enables NeCo to place the customer's product at the most advantageous sight. These sights have various storage capacities/types, freight options, soil types, weather conditions, maturity zones, conditioning facilities, etc., which give NeCo flexibility in satisfying our customer's needs. NeCo Seeds is a company that provides added value and service to our customers through variety testing and selection, contract production, state of the art processing, and by providing a top quality product.

Owensboro Grain Company

822 E. 2nd Street
Owensboro, Kentucky 42303

Tel: 270-926-2032

Fax: 270-686-6509

Email: jwright@owensborograin.com

Contact: John Wright, Vice President Planning & Development

Company Profile: Owensboro Grain operates a solvent extraction soybean processing plant and is also an integrated crusher, refiner and biodiesel producer. Unlike other soybean processors Owensboro does not market commodity soybean meal but instead has developed a value added branded soybean meal, SoyMax. SoyMax has higher

digestibility and amino acid profile than commodity soybean meals. Owensboro Grain also manufactures lecithin as well.
